

SELECTED SETUP CONFIGURATIONS FOR MISSION 10 – SORTING CENTER

Teams may choose before each match how they would like the containers in the sorting center to be set up (see the update on Nov 9, 2021 in section "Playing Field & Missions" of our [FAQs](#)). There are **6 possible configurations**, but **each can only be used once** (i.e. the configuration has to be different for each match). Please tell the referees your chosen setup configuration before each match and hand them this document to record the used configuration. If more than 6 configurations are needed over the course of the tournament, from match 7 onwards, use the previously chosen order from the beginning.
